Crippled Children

Preparing a Petition Which will Rourke. be Presented to the Governor.

Local physicians are not more acking in generosity than the medical men of other cities, interested in securing the new home for crip. pled children taht is to be built by the state, and as a result Murion stands a better chance for getting the home.

The greater number of physicians in the city have been approached on the subject, and all have stated that they will donate their services to the home in the event that it is secured for the city. Believing that there is an excellent opportunity of having a site in this city selected by the state commission, a committee of several citizens is drawing up a petition which will be given teams being tied for first place in the Governor Harris the first of next

The petition will give a very fair description of the city with its many railroad advantages, which enable persons in almost every part of the state to get in and out of the city with little inconveniences, and will ask that the site for the home selected in this city.

It is probable that the question will be decided by the commissioners and the governor during the week. One of the requirements of the commission is that the physicians in a city, where the home is to be located, must donate their service This has been done at Zanesville and Newark, the places which have been considered as most likely secure the home.

A committee of prominent citizens will present the petition to the governor and urge that this city be selected.
